

Excellent inventive talent

TECOSIM Technische Simulation, distinguished as one of the most innovative companies in Germany, received „TOP 100“-Award

Ruesselsheim, 2011-06-30. TECOSIM Technische Simulation GmbH is one of the most innovative medium-sized businesses in Germany. That is the result of the University of Economics in Vienna, which has proved the innovative performance of 272 medium-sized-businesses in Germany. The 100 best companies, among them TECOSIM, have received the „TOP 100“-Award. In Warnemuende, Lothar Späth awarded the company and congratulated the management of TECOSIM.

The company with six locations in Germany has focused on Computer Aided Engineering (CAE), the computer-based development and optimisation of components and structures. In the development of new and efficient methods and solutions, not only are the competence and experiences of the employees in demand but also their creativity and courage to unusual ideas. TECOSIM encourages an “innovative spirit” and rewards the commitment of the engineers. In the company there is an atmosphere of innovation, which is based on three pillars: TECOSIM offers its employees time, space and funds for the development of innovations and their implementation.

Each of the 230 employees working in Germany has a fixed allocation for education; they can use it for technical training or a seminar to improve certain soft skills. The employees can also use the hard- and software in the TECOSIM-offices independently of a project. In addition every single employee has access to the intranet „TECOSIM Portal“ where he or she can find information about projects and discuss methods of resolution.

Different research projects show the success of the TECOSIM atmosphere of innovation: the company works together with universities and research institutions very effectively. Several projects are even supported by the national or European funding.

Press Release

„For us, creative ideas and solutions are not only an instrument to increase sales.“ Udo Jankowski, managing director of TECOSIM explained. “Our developments are the basis for sustainable, resource-friendly and safe products – and we are still going strong! We are very proud of receiving the “TOP 100“-Award, it is a great motivation for us!”
